International Teaching Assistant Program Presents*

Applying Clickers as an Interactive Teaching & Assessment Tool in the Chemistry Class

Speakers:

Mingyu He, PhD Student in Fiber Science
Kaiyan Qiu, PhD Student in Fiber Science

It is difficult to get interaction by using conventional lecture-based teaching methods in a large chemistry classroom. The use of clickers is an effective student-centered technology that can provide instructors immediate feedback about the effectiveness of teaching. This workshop will offer strategies for using the clickers in the chemistry classroom

Friday, Nov. 13, 2009 • 2:30-3:30

Goldwin Smith Hall, Room 160

Registration is appreciated at www.cte.cornell.edu/registration.html
